DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11, drawn to method of using an immunosuppressant, method of making an immunosuppressant and an immunosuppressant as an inhibitor wherein the immunosuppressant is (formula (I)):

- (i) cyclosporin A;
- (ii) tacrolimus; or
- (iii) 33-epi-chloro-33-desoxyascomycin.

2. Upon thorough consideration of the claims, the examiner has determined that a lack of unity of invention exists, as defined in Rule 13.

PCT Rule 13.2 states that unity of invention referred to in Rule 13.1 shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. Annex B, Part 1(b), indicates that "special technical features" means those technical features, which as a whole define a contribution over the prior art. The inventions listed as Groups I(i-iii) are directed to the use of immunosuppressive compounds that share a common special technical feature of general compound structure of formula (I) (claim 2, page 22). This common special technical feature is not a contribution over the prior art as the use of a compound, cyclosporin A, of that general

formula (I) is taught by Wood *et al.* (International Publication Number WO 98/119808, see page 7). Thus, the inventions of Groups I(i-iii) lack unity of invention and Applicants must elect one compound from Group I(i-iii) as their invention.
